

Cutting down Video Relay Service? You are CRAZY! VRS is the best thing happening to hearing-impaired people and it's closest equal with hearing people on communication level. Hearing people even prefer VRS much more than text relay while speaking with hearing-impaired people due to time saving, cost saving, and clear translation on communication. Cutting down VRS is considering oppression and increase barrier to hearing-impaired people abilities to communicate in thier own language. Please think carefully!
